1) Business Scenario: What industry are you working in? Where might the data come from?

We are working in the software as a service industry. Our goal is to provide an interactive dashboard where users can search, filter and manipulate data in order to find a movie/series/video game recommendation that fits their interests. Our data will come from Kaggle.com from the dataset 'Top 1000s in IMDB' (<https://tinyurl.com/yfjnjunx>).

## Peer review

- scenario

- online sales w/ user log ins, track where time spent

- product set price att. missing, so in sales, 'total-price' att. would be invalid

-
